PROFESSIONAL SUMMARY

Data analyst experienced in dashboard development, workflow automation, reporting systems, and operational analytics. Skilled in SQL, R, Python, Tableau, Power BI, and statistical analysis with experience translating business data into actionable insights and process improvements.

EXPERIENCE

Business Systems Analyst | San José State University | 2025-Present

- Designed and deployed operational dashboards, reporting systems, and workflow automations supporting cross-functional university operations across Facilities Development & Operations.
- Built analytics dashboards and reporting workflows in WebTMA, Smartsheet, and Looker Studio supporting work order tracking, compliance reporting, and operational KPIs.
- Developed automated intake, approval, and permit-tracking workflows integrating Smartsheet, DocuSign, and Google Workspace tools.
- Created centralized reporting infrastructure and visualization systems for Fire Marshall audits, maintenance operations, project tracking, and equipment utilization.
- Managed data cleaning, permissions, user administration, and systems standardization across WebTMA, MetaBIM, and S2 platforms supporting university-wide operational workflows.

Operations Lead / Team Lead | Marine Layer | 2022-2024

- Managed retail operations, workforce scheduling, inventory coordination, and customer experience initiatives in a high-volume apparel environment.
- Analyzed sales performance, staffing trends, and operational metrics to support business performance and customer engagement goals.
- Led onboarding and employee training initiatives while improving operational consistency and workflow execution.

TECHNICAL SKILLS

Programming: SQL, R, Python, STATA, MATLAB | **Visualization:** Tableau, Power BI, Looker Studio

Analytics: Regression Analysis, Forecasting, Predictive Modeling, Exploratory Data Analysis, KPI Reporting

Tools: Excel, Smartsheet, DocuSign, WebTMA, MetaBIM, Git | **Libraries:** Pandas, ggplot2, tidymodels, XGBoost

Systems: Workflow Automation, Data Integration, API Coordination, Reporting Automation

PROJECTS

EV Policy & Consumer Behavior Research | M.S. Economics Thesis (STATA)

- Conducted regression analysis evaluating U.S. electric vehicle policy impacts on consumer behavior using STATA and Tableau.
- Performed statistical modeling, visualization, and econometric analysis of adoption trends between 2018–2020.

Promotional Pricing & Revenue Forecasting (R)

- Built forecasting and pricing analysis workflows using R, SQL-style joins, and machine learning models on grocery transaction datasets.
- Performed feature engineering and predictive modeling using XGBoost, tidymodels, and ggplot2 visualizations.

Japan Influenza Analysis (Python)

- Developed a Python analytics pipeline evaluating influenza severity, hospitalization trends, and regional spread patterns.
- Performed forecasting, time-series analysis, and custom seasonal indexing using Pandas and matplotlib.

EDUCATION

M.S. Economics - Washington State University

B.S. in Economics - Loyola Marymount University

Minors: Applied Mathematics, Dance
